QUANTITATIVE RESEARCH OVERVIEW

TIMELINE: WAVE ON WAVE

This report concludes the 9th wave of the survey. A pre-campaign wave carried out in August 2019 prior to the launch in September with 8 subsequent post-campaign waves throughout 2019-2022.

METHODOLOGY

Interviews were carried out using Dynata panel with quotas set to ensure that the sample is broadly representative by region, age, gender and LTC. CAPI data was collected F2F in areas across England.

CAPI*	710	642	-	-	-	-	668	658	698

*Note on CAPI data and analysis:

The F2F CAPI interviews are aimed to collect data from more vulnerable, harder to reach and digitally excluded audiences. As such, the sample profile differs for online and CAPI, with CAPI more likely to be older and inactive.

As in the last report, we have focused on the total sample when analysing the results, showing online only trends for past waves where relevant.

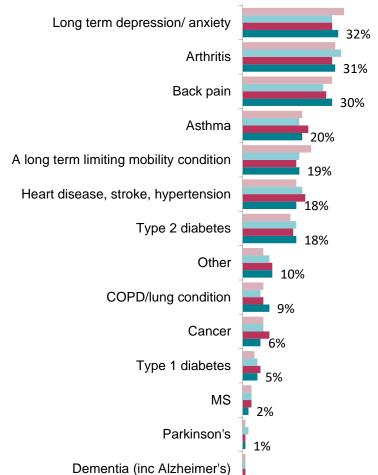

SAMPLE PROFILE (TOTAL)

The sample profile for this wave was matched to the sample from previous waves.

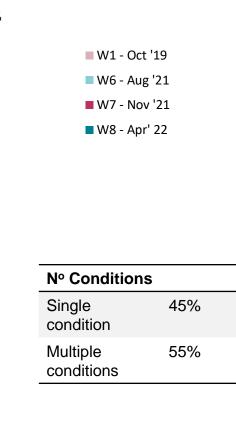

Minor weighting was applied to the post-campaign data on gender and number of conditions to ensure the sample profiles matched.
