QUANTITATIVE RESEARCH OVERVIEW

TIMELINE: WAVE ON WAVE

This report concludes the 8th wave of the survey. A pre-campaign wave carried out in August 2019 prior to the launch in September with 7 subsequent post-campaign waves throughout 2019-2021.

METHODOLOGY

Interviews were carried out using Dynata panel with quotas set to ensure that the sample is broadly representative by region, age, gender and LTC. CAPI data was collected F2F in areas across England.

CAPI*	710	642	-	-	-	-	668	658

*Note on CAPI data and analysis:

The F2F CAPI interviews are aimed to collect data from more vulnerable, harder to reach and digitally excluded audiences. As such, the sample profile differs for online and CAPI, with CAPI more likely to be older and inactive.

For the first time since W1, we have focused on the total sample when analysing the results, showing online only trends where relevant.

 - Recall and call to action both at highest levels ever observed
 - Relatability had returned to launch levels
- **Anxieties around Covid had lessened slightly but were still present for our target audience**
- **Going into autumn presented some headwind** – Covid case numbers increasing again and poorer weather / shorter days....
